Reserve...

OVATWIST™

Micronized Dehydroepiandrosterone 75mg (SR) TABLETS

Beneficially affects aging ovarian environments¹

Improves ovarian function, increases pregnancy chances and, by reducing aneuploidy, lowers miscarriage rates¹

Augments ovarian stimulation with gonadotropins in poor responders, results in improved oocytes yields¹

Improves oocyte numbers and ovarian reserve¹

1.Reprod Biol Endocrinol. 2011; 9: 67

AS A SUPPLEMENT IN:

Women with diminished ovarian reserve

Poor responders undergoing in vitro fertilization (IVF)

OVATWIST *Improves Oocyte Quality...*

OVATWIST-PLUS™

Dehydroepiandrosterone 75mg + Melatonin 3mg + Vit. D3 400 I.U. TABLETS

Rectify
the Problems
associated
with Female *Infertility...*

Dehydroepiandrosterone

- ✔ Positively affects pregnancy chances¹
- ✔ Lowers miscarriage rates¹

Melatonin

- ✔ Therapeutic and preventative effects mainly attributed to its antioxidant properties and action as hormone modulator²
- ✔ Improves fertility rate, oocyte quality, maturation and number of embryos²

Vitamin D3

- ✔ Represents a beneficial approach in combination with other medical treatments to treat female infertility³

AS A SUPPLEMENT IN:
Women with diminished
ovarian reserve

Poor responders undergoing
in vitro fertilization (IVF)
